

BUILDING MATERIAL REUSE GRANTS

Structural moves

Hennepin County has funding available for structural move projects that physically relocate a building to another location as an alternative to mechanical demolition.

Structural moves salvage the entire structure, avoiding demolition waste and preserving the cultural and historical integrity of the building. Property owners and developers of residential or commercial properties can receive up to \$15,000 to help offset the additional time and labor costs associated with structural moves.

Eligible recipients	Private property owners
Eligible property types	• Residential or commercial properties • Project size at least 500 square feet
Application timeline	• Applications are accepted on an ongoing basis until available funds are depleted. • Building move must take place after the agreement to issue grant funds is established. Grant funding cannot be used for work that has already been completed.
Amount of funding available per project	• \$15,000 maximum per project (based on \$5 per square foot)
Matching funds	• No match required
Reporting requirements	Documentation verifying new project designs incorporate: • All non-reusable building material generated from the project (i.e. foundation) must be recycled or sent to a construction and demolition waste recycling processing facility that achieves a minimum 60% recycling rate. Visit HennepinCounty.gov/salvage for a list of facilities that meet this criteria.
