Recycling requirements

Verifying compostability

Prior to purchasing compostable products, ensure that the products have been tested by a third-party fo verify they are compostable at an industrial composting facility. BPI (Biodegradable Products Institute) certification is the most common third-party certification (logo below):

To see if your products meet BPI certification, use this search tool: bpiworld.org/find-certified-products

Local vendors of compostable products

This list is not all-inclusive and businesses are not required to use these vendors or purchase these products specifically.
